

IOS Lister's Corner 2007

Category Lists: Family Group Big Days

Here are state big day tallies for specific family groups. The number following the avian families represents the total non-vagrant species that could be found in Illinois. Some counts may not appear to be significant from a state perspective, but could represent the record for a specific region (i.e. northern, central, southern); some counts may represent the record for the season.

Who wouldn't have wanted to be with Travis Mahan back on Dec 18th, as he tied the state record after finding seven owl species in the Carlyle Lake area? An exciting day no doubt. The spring record for the Heron/Egret/Bittern/Ibis family was tied this past year by a team doing a Big Day.

(updated 4/9/08; compiled by Eric Walters & Joe Lill)

LOONS/GREBES (8)

7@	Lake Carlyle	11/04/06	B.Fisher, R.Hughes, D.Jacsonson, D.Kassebaum, D.Stotz
